Testing Scope – BUGZ

Features/Pages to be Tested

1. **User Authentication**
   - Registration, login, logout flows.
   - Validation of credentials and error handling.
2. **Product Browsing & Search**
   - Product listing, categories, and filters.
   - Search functionality with valid/invalid keywords.
3. **Cart & Checkout**
   - Adding/removing products to cart.
   - Updating quantities.
   - Checkout flow including payment simulation.
4. **Contact Us & Forms**
   - Submitting "Contact Us" form with valid/invalid data.
   - Capturing and validating error/success messages.
5. **User Account Management**
   - Editing profile information.
   - Managing address details.
   - Deleting an account.

Out of Scope

- Performance/stress testing under heavy loads.

- Security testing (SQL injection, XSS, etc.).

- Non-functional requirements like scalability and memory optimization.
